

Advantages.

Simple and straightforward for you:

- Minimum disruption to production
- Takes around 30 minutes
- Results on the spot

Your advantages:

- Inspection by an external technician
- Your maintenance measures are easier to plan
- You receive information on optimization potential

Can be combined with:

- BGV inspections (UVV)
- Expert advice
- Demand-oriented warehousing

Condition Check

Competence.

The condition check is a one-time special service offer from Ortlinghaus. We analyse the current status of your drive system on site in just 30 minutes, for which you will need to plan a brief production stop. You receive the results from our service technician directly after completion of inspection.

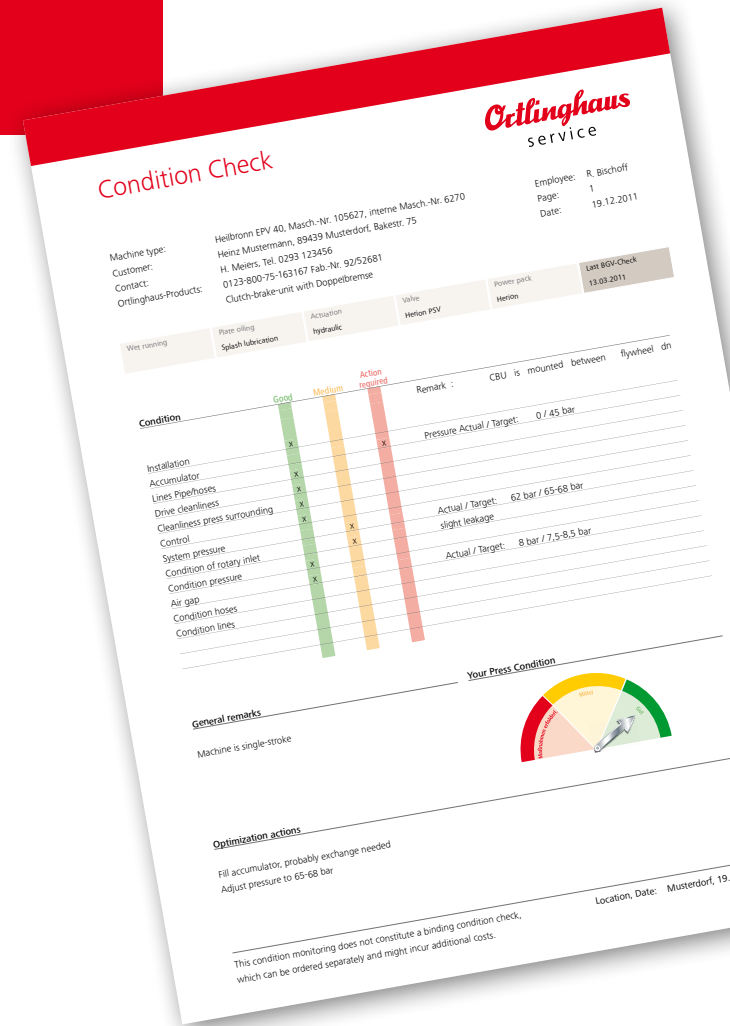

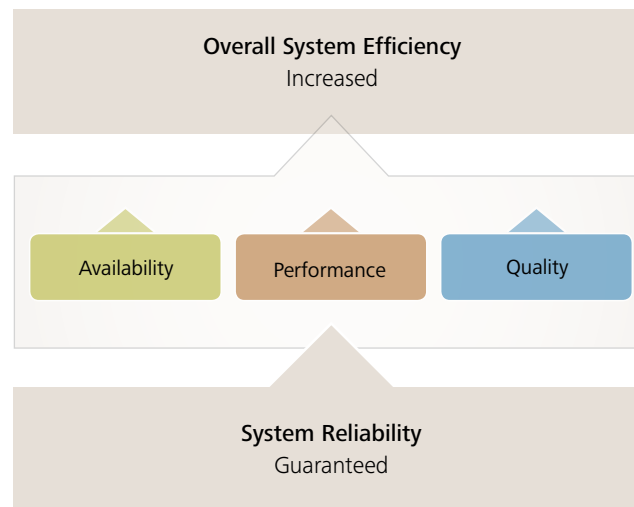

The status diagnosis is the first step you can take to improve the planning of maintenance intervals for your machinery and to avoid unplanned stops as far as possible. The efficiency of your system will improve. If desired, our service technicians are also able to advise you on further optimization measures and service innovations.

Efficiency & Safety.

The diagnosis involves evaluating the current status of:

- Installation
- Accumulator
- Lines (pipes, hoses)
- Drive cleanliness
- Cleanliness of the surrounding area
- Actuator
- System pressure
- Condition of rotary inlet
- Pressure monitoring
- Air gap

The condition check can help to improve the overall effectiveness of your system.

And what does your press look like?
