Ortlinghaus Service Kits

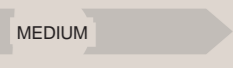

# Ortlinghaus Service Kits

Ortlinghaus service kits are carefully compiled packages of individual replacement parts needed to repair or maintain pneumatic clutch-brake combinations so as to prevent a wear-related breakdown before the next scheduled service.

Use our practical and functional service kits to carry out clutch maintenance in an economically viable way.

## Four Service Kits – The right solution for everyone

- LARGE** All necessary parts to ensure that the clutch-brake combination operates perfectly. Short downtime due to short repair times.
- MEDIUM** Comprises the parts needed for planned and preventative maintenance. The intervals are determined by the press's operating parameters.
- SMALL** For small inspections of presses in single-stroke operation.
- AIR** For continuous leakage free operation.

	Complete plates or friction blocks	Plates without lugs or friction blocks	Screws and nuts to fasten lugs	Flanged or sleeve bushing	Locking rings	Screws or bolts	Sealing rings	Pressure springs	Screws and dowel pins to connect hub and cylinder
